

Web conferencing using Zoom

(UCSF Renal Pathology and EM Services)

The Renal Pathology faculty are happy to review biopsy findings with referring clinicians and to answer any questions via web conferencing. Here is how:

1. Download and install Zoom (www.zoom.us) on the device of your choice (e.g. desktop computer or cellular phone).
2. Let us know that you would like to review the case findings via web conferencing either at the time we are contacting you with the preliminary findings or any time after.
3. Provide us with your email address. We will schedule a Zoom meeting and will email you an invite with a link to the Zoom session. Alternatively, we can give you the session ID over the phone, which can be entered into Zoom to join the conference.
4. Please call the on-call pathologist first (pager: 415-443-3208) to establish audio connection over the phone, and we can then guide you through Zoom connection to establish the video link.
5. Please ensure an appropriate setting for the conference to protect patient confidentiality.
