Differential Diagnosis of Reactive Lymphadenopathies

Daniel A. Arber, MD
Professor and Associate Chair of Pathology

Friday, June 4, 2010
12:15 P.M. - 1:15 P.M.

TOPICS COVERED

This Tutorial will present and discuss example cases of reactive lymphadenopathies and their differential diagnoses. These include:

1. Characteristic features of distinct reactive conditions in lymph nodes, including infectious mononucleosis and Kickuchi-Fujimoto lymphadenitis.
2. Neoplastic conditions that may mimic reactive proliferations in lymph nodes.
3. Ancillary studies including immunohistochemistry and molecular genetic studies that aid in the differential diagnosis of these disorders.

OBJECTIVES

Participants will:

Understand the diagnostic features of various reactive lymph node disorders as well as clues to the diagnosis of malignancies that may mimic reactive disorders.

A separate fee of $75.00 (including lunch). Limited space
